## INTRODUCTION

The City of Dalton Revenue Manual provides a comprehensive reference source for all revenue collected by the City for the General Fund. It provides documentation of recurring revenue sources and is arranged by revenue account number. Specifically, this document shows ‘how’ and ‘where’ the City acquires the funds to pay for the numerous services it provides.

A typical entry for a revenue source includes, but not limited to, the following: the revenue account number; the revenue charge code; when applicable, the authority supporting the collection of the revenue identified; a description of the revenue source; the department or division that is the revenue collector; and collection history of the revenue source.

The City’s revenues are derived from both citizens and businesses within the corporate limits of the City of Dalton. The City’s primary operating fund is the General Fund. The General Fund is considered a governmental fund under the Governmental Accounting Standards Board (GASB) and the revenues and sources of income are derived from the following major categories: Taxes, Licenses and Permits, Charges for Services, Fines and Forfeitures, Miscellaneous Revenues and Other Financing Sources.

This document will be updated periodically in an effort to include new and current revenue sources and additional potential revenue sources. Additional information and forms can be located at the city’s website, [www.daltonga.gov](http://www.daltonga.gov).
